Enterprise Funds

Generally Accepted Accounting Principles (GAAP):

- Used to Account for “Business-Type Activities” Similar to Those Found in the Private Sector

- Business-Type Activities Include Services Primarily Funded Through User Charges
Planning for Enterprise Funds

❖ Solid Business Foundation Based on Best Management Practices
❖ Realistic Operational and Financial Plan
❖ Effective, Ongoing Communication Program
Establishing a Solid Business Foundation Based on Best Management Practices
Publications from Credit Rating Agencies Discuss Enterprise Best Management Practices

- Credit Rating Agencies Will Usually Freely Provide These Publications to Issuers That They Rate, and Your Financial Advisor or Rate Consultant May Also Have Copies
- Rating Agencies Will Typically Request Copies of Financial Management Policy Documents
- Rating Criteria Are Always Evolving
  - Median Debt Service Coverage Ratios and Cash Balances Have Been Trending Upward
The Local Government’s Credit Rating Is a Reflection of Management (*)

- **Assessment of Financial Risk**
  - Management Has Limited Control Over Some Elements of Financial Risk (e.g., One Large Customer Accounts for 50% of Revenues)

- **Best Management Practices on Controllable Factors Help to Reduce Implied Financial Risk, and Can Lead to Lower Rates Over the Long Term**
  - Higher Credit Ratings, Lower Interest Rates, and Lower Issuance Costs When Debt Financing

(*) Management Includes Governing Body
What Are the Management Practices of Highly-Rated Enterprises?
Highly-Rated Enterprises…

✓ Exhibit Practices That Maximize Stability By Planning
  – The More Written and Adopted Policies, Procedures, and Plans, the Better! (Rating Agencies Will Request Copies)

✓ Anticipate Future Regulatory and Growth Demands

✓ Reliably Implement Steady Rate Increases Over Time

✓ Have Liquidity to Meet Unexpected Sales Shortfalls / Emergencies

It’s Never Too Late to Improve the Business Foundation!
Establishing the Business Foundation

▪ Establish Business Principles
  ▪ Serve as Basis for Long-Term Decision Making
  ▪ Examples:
    – Public Health and Safety
    – Maintain Financial Creditworthiness
    – Rates Affordable and Recover Full Cost of Service
    – Comply With Regulations
    – Uninterrupted Service
    – Customer Satisfaction

▪ Adopt Long-Term Business Plan
  ▪ Expansion Plans
  ▪ Sustainability Plans
  ▪ Updated Every Few Years

▪ Adopt Formal Debt Management Policy
Establishing the Business Foundation (cont.)

  - **Debt Service Coverage**
    - Should Exceed Minimum Required (e.g., 200% “All-In” Coverage)
  - **Cash Reserve Policy**
    - Working Capital (e.g., 120 Days of Operating Revenue)
    - Capital Replacement Deposits Based on Asset Management Plan or % of Revenues
      - Could Also Consider Annual Depreciation Expense
    - Rating Agencies: Enterprise With Stronger Financial Profile Might Have Days Cash on Hand Equal to One Year or More

\[
\text{Days Cash on Hand} = \frac{\text{Unrestricted cash and investments divided by operating expenditures minus depreciation}}{365}
\]

Establishing the Business Foundation (cont.)

  - Cash Reserve Policy (cont.)
    - Could Establish Reserves for:
      - Rate Stabilization
      - Anticipated Changes in Regulations
      - Alternative Water Resource Funding
      - Emergencies / Catastrophic Events
  - Benchmarking
    - Medians By Rating, Location, Etc.
      - Published By Rating Agencies
Some Key Financial Ratios Used By Credit Rating Agencies When Evaluating Enterprises

- Many Financial Metrics, But Some Financial Ratios Are Especially Important for Credit Rating

- Some Key Financial Ratios:
  - All-In Debt Service Coverage
  - Senior Lien Debt Service Coverage
  - Days Cash on Hand (Cash as % of Spending for General Obligation Bonds)
  - Outstanding Long-Term Debt Per Customer and Per Capita
  - Free Cash as Percent of Depreciation
Some Key Financial Ratios Used By Credit Rating Agencies When Evaluating Enterprises

- All-In Debt Service Coverage

  - **Definition:** Revenues Available for Debt Service (Usually Gross Revenues Less Operating Expenses Not Including Depreciation and Other Non-Cash Expenses) Divided By Total Debt Service (Senior Plus Subordinate Lien)

  - Measures Financial Margin to Meet Debt Obligations

  - Better Indicator of Enterprise's Overall Ability to Pay Its Debt Than Senior Lien Debt Service Coverage Alone
Some Key Financial Ratios Used By Credit Rating Agencies When Evaluating Enterprises (cont.)

- **All-In Debt Service Coverage (cont.)**
  - AA-Rated Enterprise May Have All-In Debt Service Coverage of 200% or Higher
  - Fitch 2020 Water and Sewer Medians

Developing a Realistic Operational and Financial Plan
Rate Cases For Enterprise Funds Are Usually Based on a Multi-Year Forecast of Revenue Requirements

- Cost of Operation and Maintenance
- Debt Service Payments (Senior and Subordinate)
- Transfers and Administration Payments
- Capital Funding from Revenue (pay-as-you-go)
- Working Capital Reserves / Rate Stabilization / Financial Compliance
  - Other Operating Revenue
  - Capacity / Impact Fees Used to Pay Growth-Related Debt Service
  - Unrestricted Interest Income
  - Transfers from Other Funds

Net Revenue Requirements Funded from User Rates
Financial Planning For Enterprise Funds Should Ideally Accomplish Multiple Objectives

- **Fund Revenue Requirements That Are “Right-Sized”**
  - Operation and Maintenance Expenses
  - Debt Service / Coverage Requirements
  - Capital Improvement Program Funding Through Rates
  - Administrative Transfers and Reserve Allowances

- **Meet or Set Course to Eventually Meet Established Financial Targets**
  - Debt Service Coverage
  - Working Capital Fund Cash Balance
  - Capital Replacement Fund Cash Balance
Financial Planning For Enterprise Funds Should Ideally Accomplish Multiple Objectives (cont.)

- **Balanced Debt Risk**
  - Outstanding Debt to Net Assets $\leq 50\%$
  - Debt Per Customer and Per Capita

- **Affordable Rates**

- **Competitive Rates**
  - Rate / Bill Comparison

- **Minimize “Rate Shock”**

- **Meet Statutory, Case Law, and Debt Instrument (e.g., Bond Ordinance / Resolution) Requirements**
Use of Graphical Management / Financial Dashboards Can Help Accomplish Objectives

- Can Communicate Projected Financial Position and Demonstrate Reasonableness of Rate Recommendations

- 90 Days of O&M

Chart 4: Available Year-End Renewal and Replacement (R&R) Account Cash Balances

- Ending Cash Balance - R&R Wastewater
- Ending Cash Balance - R&R Water
- Minimum Balance - 5% of Prior Year's Revenue
- One Year of Depreciation ($744,478)
Dashboard Design Tips

▪ All Dashboard Chart Data on One Tab
  • Easy to Print Out and Review
Dashboard Design Tips (cont.)

- **Use of Data Group Function Within Dashboard**
  - Can hide and unhide assumption tables to make changes without leaving dashboard
  - If dashboard included as table in final report, can hide charts more appropriate for management vs. public
Developing a Realistic Plan

Capital Program

- Often Primary Driver of Need for Rate Increases
- Must Be Able to Explain Purpose (Justification) of Each Project and Have Good Cost Estimates
- Could Possibly Link to Asset Management Plan
Establish Criteria to Prioritize Capital Program

Sample Criteria in Order of Priority:

- **Public Health and Safety**
  - Project Addresses Working and Public Health / Safety Issues
- **Regulatory Compliance**
  - Project Promotes Regulatory and Contractual Compliance
- **System Reliability**
  - Project Reduces Risk and Consequences of Asset Failure and Addresses Other Attributes of Asset Management (Redundancy)
- **Community / Customer Benefit**
  - Project Addresses Service Issues Such as Pressure, Taste / Odor and Customer Satisfaction
- **Sustainability**
  - Project Will Result in Long-Term Cost Efficiencies and Has Environmental “Green” Benefits
Typical Capital Program Funding Sources

- Issuance of Debt

- Revenues
  - Charges for Service / Rates
  - Cash Reserves

- Capacity / Impact Fees, Assessments, and Other Charges Collected from Growth

- Contributed Capital (e.g., Grants, Legislative Budget Appropriation), Facilities, and Property
Grant Opportunities in Florida for Utilities – Small or Economically-Disadvantaged Communities

Florida Department of Environmental Protection (FDEP)
- Small Community Wastewater Facilities Grant

United States Department of Agriculture (USDA) Rural Development
- Water and Waste Disposal Grants

Florida Department of Economic Opportunity
- Florida Small Cities Community Development Block Grant (CDBG) Program
Grant Opportunities in Florida for Utilities – All Communities

Water Management Districts
- Cooperative Funding Program (Up to 50% of Cost)

Florida Department of Environmental Protection
Florida Department of Emergency Management
Florida Department of Economic Opportunity
County Grants to Their Municipalities
For Capital Needs Not Funded Through Contributed Capital, Assessments, and Impact Fees / Charges to Growth, Should Balance Between Debt Financing and Pay-As-You-Go Capital Funding

- **Debt Financing**
  - Most Appropriate for Assets With Longer Service Lives (e.g., 15 Years or More)

- **Pay-As-You-Go Capital Funding**
  - Appropriate for Assets With Shorter Service Lives (e.g., Less than 15 Years)
  - Routine Capital Expenditures and Annual Renewals / Replacements
  - Ideally: Accrue Funds Based on Asset Replacement Schedule
Why Debt Finance?

Advantages:

- **Annual Cash Flow Reduced to Level of Debt Service Over Debt Term**
  - Can Help Prevent “Rate Shock” to Existing Customers

- **Funding Available Immediately**

  - (e.g., 30-Year Repayment Schedule, 30-Year Asset Service Life)
    - May Be Greater Fairness to Ratepayers

- **If Utility Has Growth-Related Fees Such as Impact Fees, Can Allow More Time for “Growth to Pay for Growth”**
Considerations When Evaluating Debt Instruments (To Be Discussed With Government’s Municipal Advisor)

- How Much Does the Enterprise Need?
- How Soon Does the Enterprise Need It?
- Single Project / Program to Be Funded or Multiple Projects?
- Administrative Costs – Staff Time Required to Address Reporting Requirements
  - Could Also Outsource Reporting
- Availability of Funding and Probability That Financing Could Be Secured Under the Desired Terms
- Level of Complexity of Debt Instrument
  - Ease in Projecting Debt Payments for Financial Planning Purposes
  - Ease in Calculating Historical Coverage
Considerations (cont.)

- **Borrowing Costs**
  - Interest Rate
  - Issuance Costs
  - Life Cycle Costs (Total Amount Paid During Debt Term)

<table>
<thead>
<tr>
<th></th>
<th>20-Year Clean Water SRF Loan</th>
<th>30-Year Revenue Bonds</th>
<th>20-Year Revenue Bonds</th>
</tr>
</thead>
<tbody>
<tr>

<td>$28,388,289</td>
<td>$24,687,528</td>
</tr>
</tbody>
</table>

- **Political Climate for Raising Rates to Support Debt**
Debt Structuring Option to Help Reduce “Rate Shock” If Level Debt Service Is Cost-Prohibitive (Not Available with All Options):

- Wrapped Debt Service

Structuring Options to Provide More Time to Phase-In Rates to the Level Needed to Meet Debt / Coverage Obligations:

- Capitalized Interest
  (Standard with State Revolving Fund Loans)

- Line of Credit with Interest-Only Payments
  - Permanent Financing at Later Date
Debt Financing Programs Are Always Evolving

- Recent Federal Infrastructure Acts
- Water Infrastructure Finance and Innovation Act (WIFIA)
  - Any Project Eligible for State Revolving Fund (SRF) Loan Financing Could Possibly Be Financed Through WIFIA
  - Up to 35-Year Repayment, With Up to Five-Year Deferral of Payments from Substantial Completion
  - Low, Fixed Interest Rate Equal to U.S. Treasury Rate of Similar Maturity
- Administrative Requirements for Federal Financing Programs Are Similar to Those of an SRF Loan
To the Extent Possible, Can Incorporate Best Management and Financial Practices Into Bond Resolution / Ordinance

- Binding Agreement Between Governing Body and Bondholders
- Credit Rating Agencies Prefer to See Stronger Coverage Requirements (e.g., 125%)
- Can Require Annual Renewal and Replacement Funding
- Can Make Enterprise Fund Closed-Loop, Meaning That All Funds Must Remain in Enterprise Fund and Can Only Be Used for Any Lawful Purpose of the Enterprise
- Can Have Maximum Annual Debt Service Additional Bonds Test
  - Promotes Interperiod Equity – Cannot Push All Debt Service to the Future
Developing a Realistic Plan (cont.)

Before Issuing / Incurring Debt:

- **Adopt All Rate Increases Needed During Forecast Period**
  - Shows a Commitment By Governing Body to Raise Rates When Needed
  - Many Debt Financing Options Require Demonstration That Enterprise Can Repay Debt / All Required Increases Have Been Adopted

- **Consider Adopting Automatic Rate Increase Provisions Based on an Inflationary Index (e.g., CPI, ENR Construction Cost Index) or Other Method**

- **If Utility Is a Wholesale Customer of Another Utility, Consider Adopting Provisions to Pass-Through Future Rate Increases from Wholesale Provider**
Several Local Governments Have Now Made Annual Rate Increases Automatic

- "Automatic" Means That Increases Are Implemented Without the Need for a Formal Hearing Unless Specific Action Is Taken By Governing Body
  - Often Linked to Index (Consumer Price Index, Municipal Cost Index, Engineering News-Record Construction Cost Index, etc.)

- Considered a Best Management Practice and Favored By Credit Rating Agencies
  - From Financial Risk Standpoint, Provides More Assurance That Rates Will Keep Up With Inflation
  - If Financial Projections Are Submitted as Part of Securing Debt Financing, Credit Rating Agencies (Moody's, Standard and Poor's, and Fitch Ratings) and Lenders Will Want to Know If All Rate Adjustments Needed to Support the Debt Have Been Adopted
Developing a Realistic Plan (cont.)

Operating Expenses

- **Substantial Differences Between Budgeted and Recent Actual Operating Expenses Could Be Challenged Easily**
  - Need to Be Able to Easily Communicate Reasons

- **Efficiency and Effectiveness**
  - What Cost Reductions Can Be Implemented Without Sacrificing Level of Service?

- **Keep Track of All Steps Taken to Reduce Costs**
  - Could Communicate These Efforts When Requesting Rate Increases
Developing a Realistic Plan (cont.)

Other Financial Considerations

- **Best Management Practice Per Rating Agencies:** Limit Non-Enterprise-Related Transfers to General Fund
  - Substantial Amount of Capital (Often Secured Through Debt Financing) Is Required to Provide Service
  - Should Reinvest in System
What Is a Defensible Level of Transfers to General Fund from Enterprise Fund?

- Rates and Charges Must Be Just and Equitable
  - Counties: Florida Statute 153.11(1)(c) Water Service Charges and Sewer Service Charges; Revenues
    "Such rates, fees and charges shall be just and equitable…"
  - Municipalities: Florida Statute 180.13(2) Administration of Utility; Rate Fixing and Collection of Charges
    "The ...legislative body of the municipality...may establish just and equitable rates or charges..."
What Is a Defensible Level of Transfers to General Fund from Enterprise Fund? (cont.)

  • “Absent a controlling statute, a municipal utility, like any other utility, is entitled to earn a reasonable rate of return on its capital and its rates may be set so that it earns a rate of return on its equity comparable to other similar businesses.”

  • “The parties all agree that basing rates on cost of capital is the most universally adopted and reasonable method in the industry.”
What Is a Defensible Level of Transfers to General Fund from Enterprise Fund? (cont.)

- **Defensible Transfers to General Fund from Enterprise Fund:**
  - Allocable Costs – Direct or Indirect
  - Reasonable Rate of Return

- **Potential Approaches for Determining Reasonable Rate of Return**
  - Estimating Allowable Return on Investment If Enterprise Were Private and Regulated By Florida Public Service Commission (Cost of Capital Analysis)
  - Consistent With Industry Norms

- **Should Monitor Future Bills By Florida Legislature**
  - Historical Efforts By Representatives to Limit Non-Utility-Related Transfers to General Fund
Developing a Realistic Plan (cont.)

Other Financial Considerations (cont.)

- Address Liabilities Associated With Other Post-Employment Benefits (OPEB) and Pensions

- Minimize Dependence on Fees Charged to New Growth (e.g., Impact Fees) to Pay Debt
  - User Rates Alone Should Ideally Generate Sufficient Revenues to Meet Financial Targets
Impact Fees

- Support Policy of “Growth Paying for Growth”

- Dual Rational Nexus Requirements Established Through Case Law
  - Fee Must Be Proportionate to Benefit Received

- Can Legally Be Used to Pay for Growth-Related Projects or Growth-Related Debt Service
  - Should Maintain Expansion Factor for Debt
Impact Fees (cont.)

- Florida Impact Fee Act – Section 163.31801, Florida Statutes
  - Calculation of Impact Fees Must Be Based on Most Recent and Localized Data
  - Impact Fee Collections and Expenditures Must Be Accounted for in a Separate Accounting Fund
  - Administrative Charges for Collection of Impact Fees Must Be Based on Actual Costs
  - Notice Must Be Provided No Less Than 90 Days Before Effective Date of Ordinance Imposing a Higher Impact Fee — No 90-Day Notice Required for Impact Fee Decreases
  - If Impact Fees Challenged, Government Has Burden of Proving By Preponderance of Evidence That Fees Meet Requirements of Impact Fee Act and State Legal Precedent
Impact Fees (cont.)

• Does Not Apply to Water and Sewer Connection Fees (Not All Attorneys Agree That Water and Sewer Impact Fees Are Exempt Based on This Language)

- Additions to Florida Impact Fee Act in 2021
  - Increase in Impact Fee Rate of Not More Than 25% Must Be Implemented in Two Equal Annual Increments
  - Increase in Impact Fee Greater Than 25% But Not More Than 50% Must Be Implemented in Four Equal Installments
  - Impact Fee Increase May Not Exceed 50% of Current Fee
  - Impact Fee May Not Be Increased More Than Once Every 4 Years
Impact Fees (cont.)

- Additions to Florida Impact Fee Act in 2021 (cont.)
  - Local Government Can Increase Impact Fees Beyond the Phase-In Limitations If:
    - A Demonstrated Needs Study Has Been Completed Within Past 12 Months That Expressly Demonstrates Extraordinary Circumstances Necessitating Need to Exceed Phase-In Limitations
    - Local Government Holds Two Publicly Noticed Workshops Dedicated to the Extraordinary Circumstances
    - Impact Fee Increase Is Approved By At Least Two-Thirds Vote of Governing Body

Local Government Should Obtain Guidance from Its Attorney to Ensure That Implementation of Any Impact Fee Increases Is in Compliance With Florida Law!
Impact Fees (cont.)

- Spend Fees in Timely Manner
  - Fees May Have to Be Refunded If Not Spent Within Certain Period of Time

- Maintain Paper Trail of Growth-Related Projects or Growth-Related Debt Service Funded With User Rates or Other Funding Source Due to Insufficiency of Impact Fee Collections at the Time
  - May Be Able to Reimburse User Rate / Operating Funds at a Later Date When Impact Fee Cash Balances Are Available

- Develop Formal Procedure for Applicants to Submit Alternative Impact Fee Calculation If They Believe Their Impact Would Be Less Than Under Current Methodology
Developing a Realistic Plan (cont.)

Utility Rates

- **Consider Affordability (Hot Topic in Utility Industry)**
  - **Rating Agencies**: Affordable = Monthly Utility Bill for Combined Water and Wastewater Service $\leq 2\%$ of Median Household Income (MHI) of Service Area or $\leq 1\%$ If Only One Service (Water or Wastewater)
  - **EPA**: Affordable = Monthly Utility Bill for Combined Water and Wastewater Service $\leq 4.5\%$ of MHI of Service Area
  - **Census.gov** Is Good Source for MHI Information and Percent of Persons Below Poverty Level (Another Consideration)
Developing a Realistic Plan (cont.)

Utility Rates (cont.)

- Outside-Municipality Surcharges
  - Florida Statute 180.191 Limitation on Rates Charged to Consumers Outside City Limits
  - Should Monitor Future Legislation – Historical Attempts to Limit Outside-Municipality Surcharges

“[A municipality] may charge rates, fees, and charges that are just and equitable and which are based on the same factors used in fixing the rates, fees, and charges for consumers inside the municipal boundaries. In addition thereto, the municipality may add a surcharge not to exceed 25 percent of such rates, fees, and charges for said services to consumers outside the boundaries. However, the total of all such rates, fees, and charges for the services to consumers outside the boundaries shall not be more than 50 percent in excess of the total amount the municipality charges consumers served within the municipality for corresponding service.”
Customer Notifications of Rate Increases Are Required

- Florida Statute 180.136 Water or Sewer Utilities; Notice

"Before a local government water or sewer utility increases any rate, charge, or fee for water or sewer utility service, the utility shall provide notice of the proposed increase to each customer of the utility through the utility’s billing process. The notice shall state the date, time, and place of the meeting of the governing board of the local government at which such increase will be considered.”
Utility Rates (cont.)

Consider Revenue Enhancement Opportunities

- Miscellaneous Service Charges
  - Recover Direct Costs Associated With Service That Benefits One Customer Instead of Entire Customer Base

- Guaranteed Revenue Charges

- Capital Financing Recovery Fees

- Fire Protection Charges
Communication Program
What We Would Like to Avoid...

Obtaining Public Support and Buy-In for the Enterprise Financial Plan Can Sometimes Be Challenging!
Elements of Communication Program

- Establishing the Foundation or Mindset for Funding Enterprise or Raising Rates

- Communicating Drivers for the Need to Increase Rates or Funding Level

- Communicating Rate Increases
Establishing the Foundation or Mindset for Funding Enterprise or Raising Rates

- Communicate That Enterprise Is a Business and, Like Many Businesses, a Major Objective Is Customer Satisfaction
  - Utility May Be Largest Business of Local Government (e.g., Accounted for in Enterprise Fund Established for Business-Type Activities)

- Communicate System Attributes and Size of Asset Base ($___ Million of Utility Infrastructure Managed)

- Establish Link Between Rate Increases and Long-Term Interests of Customers from Operational, Service and/or Financial Perspective
  - Public Health and Safety Is Top Priority
  - Utility Provides Essential Service 24 Hours Per Day, 7 Days Per Week
Establishing the Foundation or Mindset for Funding Enterprise or Raising Rates (cont.)

- Establish Link Between Rate Increases and Long-Term Interests of Customers from Operational, Service and/or Financial Perspective (cont.)
  - Highly-Regulated by FDEP, Water Management Agencies, and Health Departments (cont.)
    - Permits Require Satisfactory Performance
    - Possibility of Fines or Consent Orders If Enterprise Does Not Remain in Regulatory Compliance or Causes Pollution (Could Be More Expensive for Ratepayers)
  - Need to Balance Operational and Financial Considerations When Developing Rate Recommendations
Establishing the Foundation or Mindset for Funding Enterprise or Raising Rates (cont.)

- Outline Rate Guiding Principles

- Develop a Solid Business Foundation Based on Best Management Practices Recognized By Industry and Credit Rating Agencies
  - Communicate These Practices
  - Build Long-Term History / Track Record of Following These Practices
    - Will Need to Show or Demonstrate History to Third Parties When Debt Financing

- If Enterprise Already Has High Credit Rating (e.g., AA or Higher), Emphasize Desire to Maintain Rating and Benefits of Rating (Lower Interest Rates and Issuance Costs, Lower User Rates Over Long-Term)
Establishing the Foundation or Mindset for Funding Enterprise or Raising Rates (cont.)

- Educate Regulators and Public on Revenue Requirements to Be Funded Through User Rates (What Do the Rates Pay For?)

- Provide Regular Updates to Regulators About Enterprise’s Operating Conditions, Financial Position, and Major Issues Affecting System

- Provide Regulators With Tours of Facilities

- One-on-One Meetings Before Public Hearings on Rate Increases and Other Enterprise Issues
  - Could Make Public Hearing Smoother and Significantly Improve Chances of Adoption
Communicating Drivers for the Need to Increase Rates

- Outline Major Issues Affecting Enterprise System

Common Issues Include:
- Need to Fund Capital Program
  - New / Additional Debt
  - Deposits to Capital / R&R Accounts for Pay-As-You-Go Capital Funding
  - May Be Driven By New Regulations
- Revenue Collections Are Lower Than Previously Projected
- Operating Expenses Continue to Increase
Communicating Drivers for the Need to Increase Rates (cont.)

- Bring the Enterprise to the Regulators / Stakeholders
  - Utility Infrastructure Is Often "Out of Sight, Out of Mind"
  - Use Pictures and Samples at Public Meetings to Demonstrate Renewal and Replacement Needs
    - Communicate That Renewal and Replacement Needs Will Not Go Away, But Will Be More Expensive to Address in the Future
    - If Applicable, Communicate Line Break Statistics for Utility
Communicating Drivers for the Need to Increase Rates (cont.)

- Bring the Enterprise to the Regulators / Stakeholders (cont.)
  - Use “BEFORE” and “AFTER” Pictures to Demonstrate Historical Accomplishments
    - Can Be Useful to Show Regulators the Results of Prior Rate Increases

OLD  NEW  OLD  NEW
Communicating Drivers for the Need to Increase Rates (cont.)

- Communicate Efforts to Control Costs, But Mention That Most Costs Are Fixed, and That There Are Several Costs Over Which Enterprise Has No Control (e.g., Electricity, Chemicals, Fuel)
  - Some Costs Driven By Global Markets / Supply and Demand
  - Competition for Scarce Resources Such as Concrete and Building Materials

- **Explain That Permanent Increases in Costs Must Ultimately Be Passed Through to Customer Rates**

<table>

</table>
Communicating Drivers for the Need to Increase Rates (cont.)

- Be Able to Provide Basis for Projected Cost Increases That Would Be Acceptable to Third-Party Reviewer
  - Develop Understanding of Cost Drivers
    - **Electricity and Chemicals**: Might Be Driven By Commodity Costs Plus Changes in Plant Flows
    - **General Insurance**: Might Be Driven By Changes in Fixed Asset Base Due to Implementation of Capital Program
    - **Uniforms**: Might Be Driven By Inflation in Cost of Uniforms Plus Changes in Number of Employees

- Perform Reality Check Between Budgeted Amounts and Recent Actuals, and Be Able to Explain Differences
Some References for Developing Projections: (Most Are Free)

- Enterprise History
- Congressional Budget Office for Inflation Projections – Budget and Economic Outlook (www.cbo.gov)
- Engineering News-Record for Construction Cost Index (www.enr.com)
- American City and County for Municipal Cost Index (www.americancityandcounty.com)
- Other Federal and State Government Websites
Communicating User Rate Increases

- Determine Whether to Express Rate Increases in Percentages, Dollars, or Both
  - Dollars Often More Palatable; Both Dollars and Percentages May Be Reported By Any Media Covering the Proceedings
  - Could Relate Monthly Increase to Cost of Everyday Item (e.g., Coffee at Favorite Coffeehouse)
  - Cost Per Gallon Communicates Value of Water and Wastewater Service When Compared with Cost Per Gallon of Other Commodities (e.g., Bottled Water, Milk, Gas, etc.)
### Communicating User Rate Increases (cont.)

#### Proposed Rate Adjustments Through Fiscal Year 2033

**Identified Revenue Adjustments ($ thousands):**

- Water System: $0 in 2020, $275, $214, $185 in 2025
- Wastewater System: $146, $337, $341, $421 in 2025
- Combined System: $133, $106, $199, $155, $424 in 2025

**Effective Months of Revenue Adjustments:**

- Water System: 12 months each year
- Wastewater System: 12 months each year
- Combined System: 12 months each year

**Revenue Surplus / Deficiency Under Proposed Adjustments ($ thousands):**

- Combined System: $3, $252, $275, $275, $214, $185 in 2025

**Ending Cash Balance - Utility Fund (Working Capital) Cash Balances:**

- 2020: $0
- 2021: $1,500
- 2022: $2,500
- 2023: $3,500
- 2024: $4,500
- 2025: $5,500

**Calculated Debt Service Coverage**

- Target Debt Service Coverage (150%)
- Minimum Debt Service Coverage (125%)

**Available Year-End Renewal and Replacement (R&R) Account Cash Balances:**

- 2020: $0
- 2021: $1,000
- 2022: $2,000
- 2023: $3,000
- 2024: $4,000
- 2025: $5,000

**Funding of Capital Improvement Program:**

- Debt Proceeds from Bank Loan 1
- Debt Proceeds from Bank Loan 2
- Grants / Contributions
- State Department of Transportation
- Local Government

---

**Chart 1: Summary of Revenue Adjustments**

**Chart 2: Summarized Revenue Requirements Analysis - Combined System**

**Chart 3: Available Year-End Utility Fund (Working Capital) Cash Balances**

**Chart 4: Available Year-End Renewal and Replacement (R&R) Account Cash Balances**

**Chart 6: Funding of Capital Improvement Program**
Communicating User Rate Increases (cont.)

- **Explain What Might Happen to Financial Position If Rate Increases Not Approved**

  - **Non-Compliance Risk (e.g., Coverage Not Met) – Technical Default: Risk of Credit Rating Downgrade**
  - **Non-Compliance Risk – Nonpayment: Risk of Bonds / Loans Being Called and All Principal Due**
Communicating User Rate Increases (cont.)

- Explain What Might Happen to Financial Position If Rate Increases Not Approved (cont.)
  - Could Utilize Scenario Analysis Graphs
Communicating User Rate Increases (cont.)

- **Demonstrate Rate Competitiveness – Bill Comparison With Other Neighboring Enterprises (or Enterprises Benchmarked Against)**
  - Explain That Bill Comparison Is Not Report Card on How Well Enterprises Are Being Managed
  - Could Outline Reasons Why User Rates Differ Among Utilities:
    - Size of Existing Customer Base / Available System Growth
    - Demographics (e.g., Customers Spread Out vs. Close Together, Types of Customers Served)
    - Level of Capital Improvements to Meet Service Area Growth
    - Amount of Needed Renewals and Replacements / Remaining Service Life of Assets
Communicating User Rate Increases (cont.)

- Demonstrate Rate Competitiveness – Bill Comparison With Other Neighboring Enterprises (or Enterprises Benchmarked Against) (cont.)

  - Could Outline Reasons Why User Rates Differ Among Utilities: (cont.)
    - Amount of General Fund and Administrative Fee Transfers
    - Differences in Bond / Debt Covenants
    - Source of Water Supply and Treatment Process Costs
    - Plant Capacity Utilization and Assistance in Funding of Such Capacity (e.g., Grants, Impact Fees)
    - Time of Last Rate Review
    - Stormwater: Often Significant Differences in Services Provided
Communicating User Rate Increases (cont.)

- In Bill Comparison, Show Utilities Involved in Rate Studies or Planning to Increase Rates

- If Monthly Bill for Utility Appears High By Comparison
  - Explain Why Rates Are Higher
  - See If Bill Is Comparable to Those of Utilities With Similar Service Area Characteristics
    - Same Treatment Process
    - Same Wholesale Service Provider
    - Same Level of Service
    - Should Develop Set of Utilities Appropriate for Benchmarking
Communicating User Rate Increases (cont.)

Comparison of Monthly Charges for Combined Water and Wastewater Service for Single Family Residential Customers Using 3,000 Gallons

Other Florida Utilities’ Average: $67.61

[*] Utility is currently involved in a rate study, is planning to conduct a rate study, or plans to implement a rate revision or price index / pass-through adjustment within the next twelve months following the comparison preparation date.
Communicating User Rate Increases (cont.)

- If Monthly Bills Are Highest in Area, Could Possibly Show:
  - Enterprises in State of Florida With Higher Rates
  - Enterprises in Other States With Higher Rates

- To Address Common “We Can’t Afford This,” Demonstrate Rate Affordability
  - Explain Median Household Income Financial Metric Used By EPA, FDEP, USDA and Credit Rating Agencies
  - Could Consider Establishing Low-Income Affordability Program Funded from Sources Other Than User Rates (e.g., General Fund, Late Fees, etc.)
**Communicating User Rate Increases (cont.)**

- Could Show Recent Rate Increase Activity of Other Entities (Planned or Implemented)

Communicating User Rate Increases (cont.)

- If Enterprise Has Not Adjusted Rates in a Long Time, Compare Bills Under Rate Increases to Bills Under Current Rates Adjusted for Historical Inflation (CPI, ENR Construction Cost Index, etc.)
Consider Developing a Rate "Questions and Answers" Document

- Addresses Questions from Customers and Members of the Governing Body
- Could Possibly Distribute to Members of Governing Body Prior Public Hearing or Customer Notifications
- Could Possibly Publish on Website
- Could Possibly Include as Part of Agenda Item for Public Hearing
Consider Developing a Rate "Questions and Answers" Document (cont.)

1. What do we get for the rate increases?
2. Are the City's water and wastewater rates high?
3. Why is the proposed Fiscal Year 2024 rate increase so high? Can it be lowered?
4. How many years of rate adjustments should be adopted?
5. What would happen if the rates were not increased?
6. Why is a bond rating important?
7. Is the utility at risk of a bond rating downgrade?
8. How often should the City perform a utility rate study?
9. Why should I pay a monthly service availability charge if I don't use any water?
10. Is the utility's multi-year capital program really needed?
11. Why have the utility salaries and benefits increased so much over the past few years?
12. Can grants be used to reduce the rate increases?
13. Why do transfers to the General Fund make up about 20% of the utility's operating expenses?
14. Are affordability programs available to help low-income residents pay their water and wastewater bills?
Consider Developing a Rate "Questions and Answers" Document (cont.)

How many years of rate adjustments should be adopted?

Five (5) years of rate adjustments are recommended to be adopted. To implement the multi-year capital program, the City staff needs to know how much revenue the utility will collect since projects usually take more than one year to complete.

If the utility seeks debt financing for a portion of the capital program, bond rating agencies and lending institutions / programs typically want to see five years of projections. In the evaluation of the utility's ability to repay the debt, only rate adjustments that have already been adopted will be counted.
Communication Program (cont.)

- Have a Well-Developed Rate Resolution or Ordinance
  - Summarizes Basis for Rate Case
  - Can Help "Set the Mood" for Raising Rates

- Well-Written Resolution/Ordinance Facilitates Public Understanding and Provides a Public Record for Customers to Reference Regarding Why the Rate Decisions Were Made
  - During Challenging Times, Wording in Resolution/Ordinance Is One More Communication Tool That Can Be Utilized By the Enterprise
Communication Program (cont.)

- **Tips and Strategies for Optimizing Rate Resolution or Ordinance**
  - Stating That the Local Government Owns a Utility System That Provides an Essential Service on a Continual Basis
  - Mentioning How the Utility Operates in a Highly Regulated Environment and Must Comply With all State and Local Regulations
  - Describing the Costs That the Rates, Fees, or Charges Pay for / Recover
Communication Program (cont.)

- Tips and Strategies for Optimizing Rate Resolution or Ordinance (cont.)
  - If Applicable, Providing a History of the Last Time the Rates Were Increased and How Inflation Has Continued to Affect the Utility's Operating and Capital Costs
  - Discussing Why Rate Increases Are Needed, Such as the Need to Fund Critical Capital Needs for the Next Several Years
  - Mentioning How the Rate Adjustments Are Needed to Provide Access to Capital Markets
Communication Program (cont.)

- Tips and Strategies for Optimizing Rate Resolution or Ordinance (cont.)
  - Stating that securing debt financing requires the utility to demonstrate to lenders, bondholders, and credit rating agencies that the utility has adopted a schedule of rates to support the debt.
  - Outlining all public outreach activities conducted as part of developing the rate recommendations and the results of such activities (e.g., financial advisory committee or development advisory committee voted unanimously to accept the recommendations).
Communication Program (cont.)

- Tips and Strategies for Optimizing Rate Resolution or Ordinance (cont.)
  - Referencing Any Financial Policy Document Adopted for the Enterprise and the Need to Maintain Compliance with the Financial Policies for the Long-Term Benefit of Customers
  - Mentioning How the Proposed Rates Are Considered Competitive
  - Discussing How the Proposed Rates Are Considered Affordable by Utility Industry Standards
SOME FINAL THOUGHTS:

- Developing Financial Plan and Rate Recommendations: Many Possibilities (No Single “Right Answer”)

- Should Make Sure Any Financial Advice Is Objective

- Debt Financing Programs and Grant Opportunities Continue to Evolve

- May Not Be Able to Solve All Financial Issues at Once, Especially If Enterprise Is “Playing Catch Up”
  - May Need to Take Small Steps Over Time to Gradually Build the Financial Position to an Optimal Level
SOME FINAL THOUGHTS (cont.):

- **Financial Plan Should:**
  - Be Reasonable and Affordable
  - Allow Enterprise to Accomplish Objectives
  - Promote Sustainability
  - Enable Enterprise to Meet Financial Targets (Without Significantly Exceeding Them)

- Should Ideally Build / Establish Long-Term History of Following Plan and Meeting Targets

- For the Long-Term Interests of Customers, Operational and Financial Planning – Including Ratemaking – Should Be Proactive, Not Reactive
  - Keep Up With Inflation or Permanent Increases in Costs
  - Lower User Rates Over the Long-Term
  - Balanced Debt Risk
  - Higher Credit Rating (and Lower Interest Rates) When Debt Financing
